

LESSON
7•5**Equivalent Names**

You need ten pennies.

1. Look at the first row on the table below. Using 10 pennies, you can make 3 groups of 3 pennies. A 3 is in the first column.
2. Because there is only 1 penny left, you cannot make any groups of 2 pennies. 0 is written in the Groups of 2 pennies column.
3. Because there is 1 penny left, you can make 1 group of 1 penny. 1 is written in the third column.
4. 10 pennies in all were used. 10 is written in the last column.
5. Complete the table. Find different ways to use 10 pennies in all for each row.
